## IN THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application.

1. Cancelled

1 4

- 2. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein said needle has a cross-section other than circular.
- 3. (Previously Presented) The cannula/needle combination as set forth in, claim 10, wherein said needle is provided with at least one longitudinally extending groove, indentation or notch.
- 4. (Previously Presented) The cannula/needle combination as set forth claim 10, wherein said needle is provided with at least a longitudinally extending flat.
- 5. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein said cannula comprises a cross-section other than circular.
- 6. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein an inner cross-section of said cannula (1) is oval.
- 7. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein an inner cross-section of said cannula is provided with at least one longitudinal groove, indentation or notch extending to an end of said cannula.
- 8. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein an inner cross-section of said cannula is provided with at least one longitudinally extending flat.
- 9. (Previously Presented) The cannula/needle combination as set forth in claim 10, wherein said needle of said combination is configured as a non-hollow needle.

- 10. (Previously Presented) A cannula/needle combination for a catheter head for administering a fluid substance, comprising:
  - a needle; and
- a cannula surrounding the needle in a snug fit between an inner wall of the cannula and an outer wall of the needle; wherein
- a clearance is configured between the inner wall of the cannula and the outer wall of the needle, the fluid substance communicated in the clearance without the needle being necessarily hollow.
- 11. (Previously Presented) The cannula/needle combination of claim 10, wherein the needle has no opening.
- 12. (Previously Presented) The cannula/needle combination of claim 10, wherein the cannula/needle combination is in fluid communication with a catheter.
- 13. (Previously Presented) The cannula/needle combination of claim 10, wherein said communication of said fluid substance in the clearance comprises priming.
